

Stock&Trace for manufacturing

## Ensure **proper inventory management** from the arrival of raw materials, through their processing, to the final product

Manage your different inventories at various manufacturing stages using Stock&Trace, a cloud-based Warehouse Management System (WMS) accessible from any device with an internet connection.

### The problem to **solve**

The manufacturing process involves managing products in two main lifecycle stages: raw materials and finished products. This requires having full visibility of all resources including how they are used, stored, and handled. If these processes are not performed adequately, they can result in increased time consumption and error incidence.

Stock&Trace for manufacturing

## Achieve your goals with Stock&Trace

Optimize your inventory tracking process and **get real-time visibility of your inventory levels and their locations**. With our WMS, you can consult customized reports according to your needs and receive automated email notifications.

Efficiently manage the production process from the reception of raw materials to the delivery of finished products using an integrated system. This approach allows you to **minimize discrepancies in your material and final product inventory**, ensuring smooth and accurate management throughout all transformation stages.

Increase your warehouse's productivity by configuring agile workflows. Define validations for your incoming and outgoing processes, select the optimal picking sequence for your process (FIFO, LIFO, Expiry Date), **manage different locations with their replenishment levels, among other available options**.

### Optimize your logistic plan with the benefits that make Stock&Trace the WMS indicated for you

- A system configurable to your company's characteristics.
- Custom training and support.
- API management to connect with other systems (ERP, e-commerce, etc.).
- Supply of hardware and specialized material.

Do you have any doubts about the capabilities of Stock&Trace and how its use can optimize your distribution operations?

Contact us, and through a detailed analysis, we can adjust a plan tailored to your needs.
